Cargill Salt Ponds, San Francisco Bay: At Cargill's request, the Corps of Engineers Headquarters had been working to determine the scope of waters covered by the Clean Water Act at Cargill's Redwood City site adjacent to the San Francisco Bay. The 1,478 acre site is a former tidal marsh that was diked off from San Francisco Bay for salt production in the early 1900's and is now proposed for residential development. Because of the unique circumstances of the site, EPA notified the Corps and Cargill on March 18, 2015 that the site would be placed on the Special Case list, which leaves the jurisdictional determination to be made by EPA in accordance with a 1989 MOA. We will continue to work closely with the Corps as we make the final determination.
